PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Do correction for word 'its' as it's in the title2. Provide reference for the paragraph indicating Blood pressure measurement: 'Hypertension was defined as a systolic pressure of \geq 140mmHg and/or a diastolic blood pressure of \geq 90mmHg'.3. Please specify age limit for the participants. Author had mentioned the age (>18years). What is the upper limit of age of participants.4. In conclusion:females are more prone for abdominal obesity ; Please justify this statement. As females in age group of (>18 years) are under the influence of many hormones and is of reproductive age group. So they are likely to develop obesity in this age.5. Study was conducted in the year 2014. Almost one decade back. During this period much research has been done with same hypothesis.	
Minor REVISION comments	<ol style="list-style-type: none">1. Please do check for the grammar throughout the text2. Rephrase the conclusion	
Optional/General comments	NIL	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
