

**Editor's Comment:**

After analyzing the article and despite the improvements made in the last review based on the suggestions given to authors, its greatest fragility remains (even after they have been added) the scarcity of bibliographic references used that is reflected in the poor capacity to discuss the results. If the Editor considers that the article should be published as is, I have nothing to owe.

**Editor's Details:**

Dr. Carla Maria Ferreira Guerreiro da Silva Mendes  
Nurse Director at Centro Hospitalar de Setúbal, Portugal.
