Compulsory REVISION comments	Introduction. Statistics on plastic usage in the EU, recycling and other types of disposals is from 2014-15 which is not so recent, it matters since this industry is rapidly developing. I would recommend the authors to search for the most recent available data. Discussion. 3.2 "Several cavities were detected (0.3 - 0.4 m) by SEM". It seems to be a typo in the metrics. Conclusion. The reference is lacked in the end of conclusion (when the authors mention the caterpillar). Literature. 29 ref. Please check the year.	
Minor REVISION comments	NA	
Optional/General comments	Probably the key-word " <i>abiotic factors</i> " does not fit the idea of the article perfectly
