

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_93923
Title of the Manuscript:	Forecasting potential evapotranspiration using seasonal ARIMA model for Northern Telangana Zone
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>It is a job that is carried out in an adequate way only that it contains the following considerations:</p> <ul style="list-style-type: none"> - Non-parsimony in the non-stationary part (2,0,2) - The notation is not correct in the general expression of the ARIMA model - All equations must be written with equation editor - You must list the equations you wrote <p>The lack of parsimony leads to an overfitting in the model.</p>	
Minor REVISION comments	<p>Contains formatting errors: separation between the period and the following word. The notation is not consistent in some parts, for example, "Chi-square" and in another part write "Chi square", it must be consistent throughout the writing and use the correct one.</p>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
