### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Title suggestion to change. Abstract too brief. Requires elaboration on the problem statement. Why is omiron infection in children is a thing to be highlighted. What are the impacts. grammatical errors needs to be corrected.</p> <p>Introduction requires many references. is the statement regarding delta or omicron virus?</p> <p>ALL figures used requires references. It is important to state the figures which are cut and paste from what source.</p> <p>Many grammatical errors and too few references used. this seems like a more of students notes rather than a proper manuscript writing. Requires a total rewrite of all the paragraph.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<p>This review article is poorly executed. Needing a total rewriting. It seems as a jotting of the notes rather than a manuscript writing. Too few references to help the article. Maybe require about 50 to 60 articles to clarify the statements used in the article to challenge or confirm your ideas regarding omicron infection n children in Russia. Discussions is too short and there is no conclusion of the article above. May require major revision. Good luck and all the best.</p>
