

Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_93804
Title of the Manuscript:	The solution of fractional diffusion-reaction equation via the Regular Perturbation Method (RPM)
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Although the article in question falls within the scope of Journal of Advances in Mathematics and Computer Science, in my opinion there are some necessary changes to be made before the article is accepted. Being a study of equations, in order to prove that the results obtained are correct, it is important that the author presents a simulation. In this specific case, the author mentions the result of another work but reveals the difference between using one or the other, nor the advantage of using the one presented.	
Minor REVISION comments	In my opinion, the author needs to make some changes for the article to be accepted. When doing the study/development of formulas, it is necessary to prove that the final formula really works.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
