PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ol style="list-style-type: none">1. Pay attention to abbreviation, do not write abbreviations of words that have never been mentioned before.2. In the results section, the author only changes the table to written form. The explanation of the results should be more detailed, including the interpretation of the presented ROC curve, etc. Don't just include numbers and p-values.3. The results of the logistic regression should include the equation formed by each variable: Logit (variable dependent Y) = constant + β variable independent X1 + β variable independent X24. There are many things that must be considered in table 3. Include the p-value so that it can be seen which variables have a significant effect and which do not.5. The explanation of table 3 needs to convey the interpretation of the odd ratio for each variable	
Optional/General comments
