PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Good work and it will be a valuable addition to medical data for rare case reports. Good study subject with correct case presentation and concerned references. But may I introduce you some suggestions to make your work perfect, like: -adding Nigeria to keywords to refer strongly to your work. -correction or explanation of some phrases such as "Baby was delivered in a Traditional Birth Attendant (TBA) facility, at 41 weeks"??? -from abstract omit reasons of converting <i>Cryptococcus</i> species from non-pathogenic to pathogenic species and list them only in discussion. -in abstract refer to mixture of sand and olive oil message as a pollution source of <i>Cryptococcus</i> species.	
Minor REVISION comments	-In table 1, change one of two letters F because one of them refer to female and another to Favourable, use S survival instead of F favourable under outcome. - Rewrite discussion to concentrate on important differences in disease symptoms between your case and others such as normal baby weight with possible scientific explanations and comparisons with other cases.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
