PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The title of the paper should be corrected There is lack of logical arrangement in introduction. The author need to correct flight of thought. There are so many sensitive statements without citations. This must be corrected. The authors should read PRISMA and get details information on method, results and discussion in systematic review. No results section in the main work. Discussion should be logical based on categories of the findings such as fetal distress, miscarriage, respiratory distress, and preterm delivery. Please make conclusion based on your title and results. See my comments on conclusion under abstract.	
Minor REVISION comments	Other minor comment are found in the main manuscript	
Optional/General comments	The review is relevant but the author need to put on more effort to make the paper mor scientific. PRISMA will be good for the author to read and revised the paper based on it.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
