### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>No revision required</b>	
<b>Minor</b> REVISION comments	The role of Lactobacillus as a preventive measure in HNC could have been mentioned in some detail in Conclusion so as to highlight its importance.	
<b>Optional/General</b> comments	The manuscript is detailed but lengthy. A systemic review could have been made better with the inclusion of charts and tables, hence giving a glimpse of roles of various bacteria and viruses.  A very detailed and well-researched article. The details collected from various papers regarding the activities of various microbes, their products and their actions as carcinogens could act a benchmark for further studies. However, charts and tables would have made the paper more interesting.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
