

**Editor's Comment:**

I read with a great interest the article titled "Effects of thymoquinone and cisplatin on c-MYC, KRAS, p53 and EGFR gene expression in lung cancer cell lines" and reviewers comments.

I have some revisions to suggest.

1) Introduction and Discussion should be improved.

According to the previous reviewers' nice comments, the manuscript should be revised.

2) The listed references were too old.

It should be updated.

Editorial Decision: Revision required.

**Editor's Details:**

Dr. Sung-Chul Lim  
Head professor of Pathology,  
Research Instrument Collectivization Center,  
Institute of Medical Research,  
Chosun University Hospital, South Korea.
