

**Editor's Comment:**

In relation to the Work JERR 91749 "UNDERSTANDING OF TRAFFIC SIGNS BY DRIVERS ON URBAN ROADS – A CASE STUDY OF ILORIN, KWARA STATE", I consider that the authors have satisfactorily addressed the recommendations of the referees. However, I suggest that before the article is published, the authors add at least two references from the years 2019-2022. Also, the referencing system should change to the one used by the JERR journal.
