

Editor's Comment:

Regarding on Manuscript entitled "Development and testing of hydrocyclone separator for biodiesel", here are a few comments:

1. Title should be revised as "Development and performance of hydrocyclone separator for biodiesel production".
2. For the keyword list - should remove "design" from the list.
3. Please include a paragraph of appropriate biodiesel confirmation analysis (using analytical equipment) in the Methodology and the Result & Discussion part.

Please do the needful correction before accepting for publication.
