

Editor's Comment:

Greetings and I trust you are doing well. Kindly find attached the editorial decision for the above manuscript. My decision is to ACCEPT WITH MINOR REVISIONS. Having thoroughly reviewed the review comments and revised manuscript, these points are crucial to be fixed:

1. The discussion section should be expanded. The findings must be discussed extensively by scholarly comparing and contrasting them with previous studies.

2. In the concluding section, state further areas for research based on the conclusions that have been drawn to acknowledge the cyclical nature of the research process.
