

Review Form 1.6

Journal Name:	Journal of Complementary and Alternative Medical Research
Manuscript Number:	Ms_JOCAMR_93158
Title of the Manuscript:	Efficacy of Environics Color Slides in detecting the Color deficiency and Healing
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p><u>01</u> There are some sentences in the text without reference to a previous study (or studies) in order to give evidence to their statements. Without references, these statements would be mere assumptions or allegations by the authors of the manuscript. Therefore, each of the following sentences need at least one reference to back up their statement: "Chromotherapy uses wavelengths only in the visible region, that is colours, while Phototherapy utilises polychromatic light. Photobiomodulation, on the other hand, utilizes near-red and infrared light for the healing and regeneration of tissues." "The word "Chakra" in Sanskrit means "Wheel". The energy centres of the body are represented by seven chakras. These chakras can be found along the spine of the body, from the base of the spine to the top of the skull. The colour of each chakra varies depending on the vibrational frequency. Every one of the body's seven chakras has a complementary colour that goes with it." "There are certain frequencies and wavelengths associated with each colour that affect the alignment of Chakras in the Human body. Chakras are the energy centres in the body that when disturbed may result in many ailments. There are 7 chakras in the human body and each chakra has a specific colour associated with it in a healthy body. A deficiency of certain colours in the body results in the misalignment of the colours in the respective chakra, which results in pathogenic conditions in the human body. It has also been found that colours and musical notes have corresponding frequencies. For ages, even more recently, certain frequencies and musical notes have been used to heal certain conditions. Also, colours have been used via coloured water, water in coloured bottles, and various other forms."</p> <p><u>02</u> "This study, the first of its kind, aims" should be "This study, the first of its kind, aimed" Use verbs in past tense. The study was already conducted.</p> <p><u>03</u> No power analysis was performed. Therefore, it is not possible to know whether the analysis of the results of the present study is a true finding or a pure chance. This may compromise the entire validity of this study.</p> <p><u>04</u> The following paragraph under the section 'Result' does not describe any results, only methodology: "The purpose of the study was to ascertain the efficacy of Environics Colours Slides in diagnosing health conditions and improving the same. During the study, the correlation between the health conditions detected with Environics Colour Slides along with Lecher Antenna, a scientific Instrument that detects Wavelengths based on Resonance, and the ES-Teck Medical Software was also studied."</p> <p><u>05</u> The following paragraphs are not results. Yet, they are under the section 'Result': "Thus, it can be concluded that Environics Colour Slides can reliably diagnose and correct many health conditions. Further investigations on the longevity of the improvement and more intensive studies would be beneficial for establishing this method of healing/treatment."</p> <p><u>06</u> Most of Discussion consists of a description of the 7 chakras, while the authors should be discussing the findings of the study instead.</p>	
Minor REVISION comments		
Optional/General comments
