PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>These are specific references to support this.</p> <p>1- Isirima, J. and Siminialayi, I. (2018) Effect of Chromolaena odorata Extracton Hematotoxicity and Spleen Histopathology Induced by Salmonella typhi in Wistar Rats. Pharmacology & Pharmacy, 9, 85-99. doi: 10.4236/pp.2018.94007.</p> <p>2- Ikewuchi CC, Ikewuchi JC, Ifeanacho MO, Jack DP, Ikpe CN, Ehiosun S, Ajayi TB. Protective effect of aqueous leaf extracts of Chromolaena odorata and Tridax procumbens on doxorubicin-induced hepatotoxicity in Wistar rats. Porto Biomed J. 2021 Dec 3;6(6):e143. doi: 10.1097/j.pbj.000000000000143. PMID: 34881354; PMCID: PMC8647896.</p> <p>The results could be of some interest, but the article needs an extensive and thorough review. The style is very often verbose and highly redundant, and the text is littered with analytic errors.</p> <p>The figure resolution need to be increased and the contrast of the photos are too high (kindly put the photo with no photo editing).</p> <p>Scale bars must be inserted in all figures.</p> <p>The histological results need to be rewriting the text and describe the figures.</p>	
Minor REVISION comments	<p>Abbreviations need to be revised. Use the full name with the abbreviation in between brackets for the 1st time written then use the abbreviation without brackets</p> <p>The animal's numbers and data in tables need revision.</p>	
Optional/General comments	I recommend acceptance of the manuscript for publication after major revision.
