### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>I am thankful to the advisory committee for giving me an opportunity to review this manuscript. Manuscript is well written and well organised. Descriptive survey study design is more appropriate. Data analysis used appropriate techniques. Figures and tables were adequate to depict the findings, and in fact a major strength for this study. Compared the study findings with other studies satisfactorily. Study has some valuable findings. With the support of the newest technological tools and techniques, an awareness campaign will work hand in hand with government initiatives to achieve multifold penetration of people-centric programs to realize the goals of food security and everyone's right to health.</b>	
<b>Minor</b> REVISION comments	Study objectives are appropriately formulated.	
<b>Optional/General</b> comments	The purpose of this study is to explore the awareness of good food habits and the nutritional content of everyday meals among Rural Communities. The study also looked at people's understanding of what a balanced diet is and the concept/effects of malnutrition, is a positive aspect of the study	

### **PART 2:**
