### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The manuscript is very well written, however there are some mistakes, So I strongly suggest the authors a careful revision of punctuation and orthography.  The write-up could be more structurally arranged with the appropriate headings  Abbreviations need to be better explained. A list of abbreviations would do.  The citations should follow the journal's editorial guide	
<b>Minor</b> REVISION comments	The article contains editing and translation errors.	
<b>Optional/General</b> comments	The field is current, of utmost importance, the approach is pragmatic and precise, and the results are clear, well systematized and provide useful information. The study is very impressive except for the need for structurally rearranging. I recommend publishing it after reviewing the manuscript.	

### **PART 2:**
