### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	Accept it as it is. The article aims to develop a coherent approach to quantum gravity, which is built on various ideas from related studies. The evolution of the argument appears to be trustworthy and consistent. The derivations of the formulas are not presented so minutely, but their physical meaning is explained deliberately with the proper reference to the related works. I believe the article attains the intended purpose.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
