PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In abstract the name of animal on which experiment has been made is not mentioned The sample size for acute toxicity test is too small. Only mortality has been counted after 24 hrs. No changes in physical or biochemical parameters have been checked. In results Table 1 is not clear. Fig 1 has no details The selection of the two doses are not also clear. As higher doses can cause hypoglycaemia, atleast two lower doses below 100 mg should have been studied along with these two doses to evaluate optimum dose. Mechanism of action of the plant extract is not clear. Constituents should be identified and active principle responsible for lowering glucose level should be indicated. This is only a preliminary study and needs further elaboration.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
