

Review Form 1.6

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_90489
Title of the Manuscript:	Effect of Plant Growth Promoting Bacteria on Growth and Nutrient Content of Rice
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In the manuscript "Effect of Plant Growth Promoting Bacteria on Growth and Nutrient Content of Rice", authors revealed that that the use of PGPB isolate BU Ls 28 might be used as a suitable inoculant for rice production due to the ability of this isolate to promote plant growth.</p> <p>Article is interesting and suits the journal; however, authors have to address following issues:</p> <ol style="list-style-type: none"> 1. Please write the keywords alphabetically. Don't write those words as a keyword which is part of manuscript's title. 2. Please write something about the economic/ nutritional value of rice. 3. Please clearly write the objectives and hypothesis of current study in a separate paragraph. 4. Are you sure that no research on native PGPR have been performed in the Bangladesh? Please confirm your statement or change it. 5. Did you sterile soil before using? 6. What was the size and material of pots? 7. How much soil was added per pot? 8. It was better to isolate microbes from rhizosphere of rice or some other member of Poaceae family, what do you think? 9. Did you identify microbes? 10. Did you observed growth promoting attributes of microbes? 11. What concentration of microbes (CFU) used as inoculants? 12. How control plants were treated? 13. There are several typos and grammatical mistakes throughout the manuscript. Therefore this manuscript needs substantial revision 	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
