PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an excellent report dealing with significant Technical matters. I find no fault whatsoever with the methods, data analysis, or conclusions. But In essence the paper is too good with excellent analysis. The work, as with all work coming from this particular group, is fundamentally sound. My comments here are concerned solely with the organization of the manuscript. Consideration of these points will, I believe, lead to an improving with simplifies report that better illustrates the key concepts and conclusions.	
Minor REVISION comments	I reviewed the above evaluation items and decide the result of the examination of this paper as Minor Revision. I would like to applaud the efforts of the researchers and Endeavour to make the research to the end of the research Through the additional confirmation of the typos.	
Optional/General comments	This study provides policymakers, academics, and extension workers with information about the development of effective smallholder farmer intervention strategies. The Binary logit regression model was used for analyzing the effect of different variables on the choice of the sugarcane cropping system. The study's objectives were achieved using two types of statistical analysis: descriptive and inferential (econometrics).this Theoretical and practical research topics are very novel. In addition, the development of the article and the method of empirical analysis are considered to be very appropriate and Systematic for this empirical analysis.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
