

Editor's Comment:

The revised manuscript is acceptable for publication. However, the following minor corrections should be addressed:

1. Duplicated keywords (same as the paper title) should be re-chosen.
2. If "tasar" is a proper terminology, it should all be capitalized in the text.
3. If the results are obtained by the authors through field surveys, there are no need to include the "source".
4. Table caption (Table 4) should be on top the table.
5. Use initials for the first names of the authors in the reference listing.

A thorough proof-check and English check is recommended.
