### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	COVID 19 infection is associated with a variety of thromboembolic complications, including deep vein thrombosis and pulmonary embolism. In this case, in which deep vein thrombosis with bilateral pulmonary embolism was evaluated after mild Covid infection, the patient presented with bilateral deep vein thrombosis and bilateral pulmonary embolism in the post-COVID period, although the severity of the COVID infection was mild. It appears that all relevant analyzes were performed on the patient by the investigators. The method used is suitable, the sources are up-to-date and sufficient. In my opinion, this case study is suitable for publication in your journal.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	Accept	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
