### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The article is well written , abstract is structured , introduction and discussion is to the point, brief and concise . case is of surgical interest and the proposed classifications draws the attention that the gossypiboma can result not only due to per operative retention of gauze , it can also be a sequele of post of gauze retention while dealing the wounds. So it's a good sharing of thought .	
<b>Minor</b> REVISION comments	Citing of the references may please be rechecked , I didn't have time to view these.	
<b>Optional/General</b> comments	Should be published without any alteration or change	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
