PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Desmoid tumours are derived from musculo-aponeurotic tissue or pluripotential mesenchymal tissue like other soft tissue neoplasms? In introduction, it is written as "Desmoid tumors arise from cells called fibroblasts" It need to be specified whether Desmoid is benign or locally aggressive. Why CT chest was done with diagnosis of recurrent Desmoid? It could have been done after biopsy. Why medical oncology opinion was obtained with diagnosis of Desmoid? Why cytotoxic treatment was mentioned in recommendation table, mention references for the same? What is evidence for preoperative radiotherapy for Desmoid?	
Minor REVISION comments	Spell check "pubic symphyseal"	
Optional/General comments	Even though recurrent desmoid is not a rarity, such a big size (4.5kg) is rare.	

PART 2:
