

Review Form 1.6

Journal Name:	Asian Journal of Cardiology Research
Manuscript Number:	Ms_AJCR_92828
Title of the Manuscript:	Prophylactic Potential of Corchorus olitorius Leaves against Experimentally-induced Dyslipidemia
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcr.com/index.php/AJCR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The original article, well structured and well written as a whole, has adequate methodology (with few rats, it found evidence of favorable results for the use of the researched plant). Explanatory introduction; Clear results, well presented, well-founded discussion. Good finalization and well-placed and current references in the text	
Minor REVISION comments	As a minor recommendation, I suggest removing the section on diabetes at the end of the discussion (According to several researches, experimentally-induced diabetes is associated with dyslipidemia... blood as lipoproteins along with extra triacylglycerols that were produced concurrently in the liver), as it escapes the subject addressed in the present study. Thus, the rewritten paragraph is consistent in stating that it did not assess blood glucose and once it is high, it induces dyslipidemia...	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
