PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The objective of this study is to examine the dynamic interaction between exchange rate regimes, import prices and foreign exchange reserves in developing countries, namely Nigeria, Kenya, South Africa , Egypt and Angola during the period from 2006-2021. This paper has a contribution but needs to present it in a more professional way. In this regard, please follow a good paper. The summary is missing here. I went through the paper and found some issues which are given below:</p> <ul style="list-style-type: none"> • Please enrich the literature section with studies explaining the effect of political and epidemic stability in the MENA region. • Insert a paragraph to present the results. <p>Many major studies are missing. Moreover, there is no synchronization in the telling of the history of literature. The following important COVID documents are missing.</p> <p>1- Ben Romdhane, Y., Kammoun, S. and Werghi, I. (2022), "Economic resilience to the FDI shock during the COVID-19 pandemic: evidence from Asia", Journal of Economic and Administrative Sciences, Vol. ahead-of-print No. ahead-of-print. https://doi.org/10.1108/JEAS-12-2021-0250</p> <p>2- Loukil, Y., Loukil, S., and Kammoun, S. (2019). The Economic Opportunity Cost for the Arab Spring Countries. International Journal of Social Science and Economics Invention, 5(4), pp. 48-54.. https://doi.org/10.23958/ijsssei/vol05-i04/112</p> <p>3- Ben Romdhane, Y., Loukil S., and Kammoun S. (2019). Targeting Inflation and Exchange Rate Management in Tunisia Before and After the Revolution. International Journal of Social Science and Economics Invention, 5(4), pp.40-47.. https://doi.org/10.23958/ijsssei/vol05-i04/109</p> <p>The data section is somewhat ok, but I couldn't find any methodology other than the name of the methods and the basic equation. Other interpretations are needed.</p> <p>The conclusion must include findings, implications, contributions, limitations, and future research directions, which are a bit absent in this paper.</p> <p>Cross-check the references and in-text citations whether they are present in the text as well as in the references section.</p>	
Minor REVISION comments		
Optional/General comments	<p>I am always direct in my nature of communicating review reports. Well done. The paper is simple but impactful. However, the execution can be improved. We will now discuss it. I like the simple way of writing the work, it will be very easy to read for the general public. In this regard, I am making a minor revision to it and suggesting the following changes in numerical order, so that it will be easier for you to approach them.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
