PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Dear authors, Please find my comments below: The manuscript needs professional English proofreading to improve message delivery. The title is too long, it should be revised. The paragraphs in the introduction are too long, for instance one paragraph takes up an entire page. Please divide them into several smaller paragraphs. Pay attention to the in-text citation in the introduction: in the middle of the sentence, replace the "&" symbol with "and"; try to pay more attention when presenting results, be more synthetic and correct typos in writing. Page 6: Pay attention to the English language when explaining the model. The correct terms are "constant" and "coefficient". The explanation for the X2 symbol has a typo, please correct it. Page 8: "Data analysis". The first three sentences have to be reworded because the message is not clear. Please avoid repeating 3 times "description" in a sentence. Please report results according to academic standards, check to literature in order to follow the established manner. You should also discuss results and state what the influences mean from an economic stand point. Expand the conclusions section. It is too small for the standard of the journal. Include study limitations, future research directions, comparisons with other similar studies in the literature.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
