PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper title is good but the author need to do thorough research in the paper The introduction is scanty and needs to be beefed up by providing the rationale for the paper as well as the gap to be filled A lot of articles have been written in the study area but the author did not provide adequate literature review in the subject matter to justify the methodology used in the paper. The author may wish to read the following papers https://www.researchgate.net/publication/349186556 Impact of Monetary Policy on Bank Credit in Nigeria https://www.researchgate.net/publication/357335548 The Impact of the monetary policy on the performance of deposit money banks in MENA Region Effects Of Monetary Policy On The Commercial Banks Lending In Nigeria Jegede Charles Ayodele The Effects Of Monetary Policy On Bank Lending And Economic Performance In Nigeria The author only did a theoretical review and the review is without references. In effect, the empirical review that suppose to determine the methodology and the justification for the study is conspicuously missing The methodology is not clear and so the conclusions and recommendations may not be valid The analysis is not thorough The author need to revisit the paper by doing a thorough literature review to be able to determine the gap to be filled by the study. The relevant study in the references section(The effect of deposits on monetary credit, an analytical study in a sample of Iraqi commercial banks for the period from 2004-2018) should be reviewed along with other related studies to provide direction for the paper There is need justify the methodology to be used from the theory and the review of empirical studies The analysis should be revisited to be able to come up with conclusions and useful recommendations The citations in the paper should be included in the references</p>	
Minor REVISION comments		
Optional/General comments	The paper requires major revision for it to be publishable
