General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajess.com/index.php/AJESS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	As this is research involving human beings, it should have passed through an ethics committee, where those involved would give their permission by signing a free and informed consent form, where they would be informed of the possible risks and benefits of the research.	
Minor REVISION comments		
Optional/General comments	The introduction is well-founded, conceptualizing and making a brief survey and contextualization of the theme, leading the reader to become interested and ending with a presentation of the objectives of the study. The study presents an interesting methodology, in particular how to deal with questions related to detecting dishonesty. The methodology is well described, as well as the analysis of the results. The manuscript in general has a relevant value for science. I only see the need for the approval of an ethics committee for the dissemination of this manuscript to the entire scientific community	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
