PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This is an interesting paper focusing on school quality assurance status of private secondary schools in Tanzania. I have these few suggestions/comments with the sole aim of improving the final version of this manuscript:</p> <p>In the methodology, author (s) is expected to give the total number of each respondents' group such as teachers, head of schools officials, etc. that gave total sample size of 94. You may also include the name of the participating private secondary schools for this study.</p> <p>However, kindly identify five-point scale as 5-point likert-type scale. I observed that all the tables presented need some formatting.</p> <p>In the results/discussion section, I feel the discussion of the findings of this study was inadequate especially in using the empirical studies in literature to scientifically discuss the results of this study either to support or refute the findings of this study. You are expected to use recent and relevant references to do this. May of the discussion lack this.</p> <p>Generally, author(s) are encouraged to add more recent and relevant references especially in the introduction and discussion sections of this study. Thank you.</p>	
Minor REVISION comments	Nil	
Optional/General comments	Nil	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes. Kindly please write down the ethical issues here in details)
