

Editor's Comment:

I have read the manuscript and the revised manuscript after the resubmission. In general it is an interesting work and written well (over the average I can say). I respect the author's attempt to follow the two reviewers' suggestions and I believe that it will be a work that it will be written by the specific scientific audience. The manuscript needs minor changes which are concentrated on editing (for example the use of different fonts through the manuscript) and the it needs proof reading by a native English speaker.

So the manuscript can be accepted for publication.
