Compulsory REVISION comments	This study focuses on the development of a smartphone-based free fall measurement kit using Arduino as a teaching aid for the free fall subtopic. In general, the article is well structured and organized. However: There are a lot of redundancies, or repeats of the same information. Overall, the paper is technically sound. - The proposed kit demonstrates its effectiveness as a model for teacher learning. - The results obtained are very interesting; their presentation is simple and straightforward.	
Minor REVISION comments	- Section 2.5 (Data analysis), needs more detail - There are some misprints to correct (please see attached version). - The last two sentences of the summary and the conclusion are identical!	
Optional/General comments	Please see attached my edited version of some sections of the paper
