EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>Authors have to modify again abstract and references Authors have to change direct speech.</p> <p>Reduce plagiarism report below 20%. See the attachement</p>	<p><b>We have modified the abstract, and answered the other observations. As for reducing the similarity rate to less than 20%, it is difficult to do that because the similarities ( plagiarism) in many words are one that cannot be changed: the example of the lessibisian migration, Red Sea, or the meristic mesurments. The sample is definitely one, and it does not change from one individual to another, dependent on the species, as well as describing the geographical distribution of the species in the Pacific , Indian Oceans and the Arabian Sea. This is found in all references and cannot be changed.</b></p>
