PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The present article presents a specific evaluation of the centesimal, mineral and vitamin composition of the aerial parts of Leonurus cardiaca. Despite being a technically simple work, the work was performed with adequate methodology. The discussion is well done, focusing on the potential benefits of the plant from the results obtained. I recommend its acceptance, given that it is well executed and discussed. However, I would add specific analyzes on the vegetable powder (microscopy, apparent density, rheology).	
Optional/General comments
