<b>Compulsory</b> REVISION comments	Excellent article. The subject is very actual and well presented, with relevant data. The different sections are very well developed and analysed. Excellent introduction. The methodology used is well described, as the research problems, results and discussion, and conclusions. The data analysis is quiet well detailed. The subject is a very relevant socioenvironmental topic and in some aspects similar to what we can see worldwide. The article needs, in my point of view, some minor typing adjustments and the references as well. Some changes I have already suggested. In my point of view this is a very adequate and good article.	
<b>Minor</b> REVISION comments
