PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The spelling of some words should be analysed as well as the structure of some sentences which are too long.	
Minor REVISION comments	Some information about the reasons for the selection of the reading materials could be included in the article. The author could explain why he chose such articles and how it relates with the samples selected for the research process. In the summary if findings section, the author could develop some ideas about the elements that allowed him to state such findings and confirm them.	
Optional/General comments	The article presents a very useful strategy to develop reading comprehension skill taking into account both the mother tongue and a foreign language. This ability is often mistreated in the teaching and learning process, mainly in a foreign language. I consider that presenting a little more the material proposed would provide another interesting element for the article.	

PART 2:
