### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>The topic of the research is creative, clear, and contemporary            The abstract is adequate, it represents the paper in its parts.            The introduction and background are appropriate, clear, and streamlined. But there is a problem with proper citation use!!! to support the subject. [See all suggestions in the attached Manuscript]            The methodology is actually presented in the narrative of the abstract with no specific elaboration in the text            The discussion is adequate, clear, and streamlined, but not clearly validated with relevant citations. However, this section needs attention to some editing [Many suggestions are added as shown in the attached Corrected Manuscript].            Furthermore, starting the discussion, many examples are suggested to be added as shown in the edited Manuscript attached.            The conclusion is clear.            Needs a review of the write-up of references for consistency and to match the Journal's requirements...            Needs to add missing citations and make sure all references are used in the text....            Proofreading is needed</p>	
<b>Optional/General</b> comments
