Manuscript Number:	Ms_AJMPCP_90237
Title of the Manuscript:	SARS-CoV-2 - Health education through Virtual Awareness Programme (VAP) for School children
Type of the Article	Short communication

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmpcp.com/index.php/AJMPCP/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>I feel that anticipation of Covid infection by mutated genomic variant among the children and delay in children immunization would be the basic important reasons on health education of the school children to spread Covid appropriate behaviour and reduce the transmission. In addition others ideas why using VAP and target the education of the children should be highlight clearly in this paper.</p> <p>VAP is appropriate to the current situation but some alternative ways or bimodal should be mentioned for high coverage of students in remote area where electricity and internet is not available.</p> <p>As the age and receiving capacity are different from primary school level to high school students, innovative ways of providing information and using technology e.g. video or cartoon animation would be the different. These facts should be discussed and explain widely.</p> <p>In Table 1 regarding the importance of vaccination, there should be more information about Covid vaccination for children and also the current vaccination guide line of ministry of health of the respective country</p>	
<b>Minor</b> REVISION comments	Check the spelling The sentences are too long.	
<b>Optional/General</b> comments	In general I feel that the presentation is a bit confusing and should change to more sensible with well linked factual presentation	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
