

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>(i) The author in Table 2 provided the different results(residual sum of squares) using the different utility functions, but the author did not write the mathematical form of the different utility functions(all three types).</p> <p>(ii) From the data, the final form of the utility function he has obtained(all three forms) is not written in manuscript.</p> <p>(iii) In conclusion , he says that the AIC value of logarithmic utility function is low compared to the other two functions, he should write the reason why it is good fit and its medical significance.</p>	<p>I have responded to the comments raised by the editorial team.</p>
