PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	My first remark is that the paper is written in a careful style (results), there is a spot of typos. On the other hand, the results seem to be new and the authors propose an interesting approach in s-metric spaces..	
Minor REVISION comments	To my opinion, the main ideas of the paper are interesting and the results are appropriate. However, the paper needs many improvements in : 1- Abstract 2- Introduction 3- Conclusion 4- Add some new references related to fixed point theory (in different metricspaces) : Moussaoui, A., Saleem, N., Melliani, S., Zhou, M. Fixed Point Results for New Types of Fuzzy Contractions via Admissible Functions and FZ-Simulation Functions. Axioms 2022, 11, 87. A. Moussaoui, N. Hussain, S. Melliani, N. Hayel, M.
