PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1) Paraphrase excerpts from the central assertions, examine and critique the views of previous authors in order to create own positionality. 2) What is the proposition underpinning this study? And/or, what discourse does this reflect? 3) A conceptual Framework helps to demonstrate the interrelationships among variables. 	
Minor REVISION comments	There are several intervening and moderating variables that impact endogenous and exogenous variables in this particular study. Without having to analyse their effect, a mention of them would help to understand about the nature of knowledge & how you are defending your knowledge claim of improving the VARX model. Note, any forecasting model has a residual error term to varying degrees, hence the need to mention possible causative variables.	
Optional/General comments	While the study cites three countries; for purposes of absolute generalizability, a review of the same across a number of other regions provides greater credence.	

PART 2:
