EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>There are no references in the introduction. The introduction is very poor. Material and methods: What is the design of the study? What were the variables? What was the sample size calculation? What was the statistical analysis? What was the ethics committee that approved the protocol? The genetic aspects were shown in the discussion section but in the results, I cannot find anything about it</p>	<p>In our study, the genetic analysis was not done by all our patients due to lack of means. The information provided in the discussion section regarding genetic aspects was based on data from the literature.</p>
