PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <ol style="list-style-type: none"> 1. The authors have given no history of recurrent illnesses suggestive of immunodeficiency in the case report section. In the last paragraph of discussion they suggest that the child has history of multiple hospitalisations and the fungus was nosocomially acquired from other hospital. Please clarify ? 2. What was the HIV test report. Why not MIS-C Markers tested in this child? The child had high ESR and Leukopenia ... what was the status of Covid antibody test and CRP, D-DIMER, NT-pro BNP and CPK-MB ? 3. What was sensitivity report of blood culture ? 4. Why the skin scrapings or local site swab not tested ? 5. How can't it be Staph as Vancomycin was also used for treatment? 6. By which method a platelet count of 100070 could be counted ? 7. The last paragraph of discussion needs revision. 8. The references are not citable. No mention of journal issue , page number etc included . Please revise the reference list as per standard format. | |
| Minor REVISION comments | <ol style="list-style-type: none"> 1. Include anthropometric measurements of the child with percentile deviations. 2. What was the UFH report ? 3. Why Amphotericin – B was revised in place of Fluconazole...give reference. | |
| Optional/General comments | The manuscript is poorly written with a lot of spelling and grammar mistakes. Please revise. | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
