

Editor's Comment:

Request for editorial decision for manuscript number: 2022/AJPR/91584

MY editorial decision.

- 1) **This article is very good research article. The medical records IS RIGHT , Impact of Serum Vitamin D Status on the Outcome of Ventilator-Associated Pneumonia in Neonates IS good topical and the research is Closely combined with clinical work ,so it is very important .**
- 2) **It is a study of academic vitamins for newborns, so there should be ethical documents. Has this study been approved by the hospital's ethical committee? Has it been reviewed by the ethical committee ?**
- 3) **However, the references is 27 but more is old ,so need 2-3 newest in 2021-2022**
- 4) **Accepted After Minor Revision.**
