### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Nil	
<b>Minor</b> REVISION comments	Outcome of study should be mentioned properly and how it is going to help us in future studies. The advantages of the present study were not adequately explained. Tabulation had to be done separately. References to similar studies with a larger sample size should be mentioned. The introductory section was suggested to be reduced to a few lines because Covid-19 and its impact is a well-known subject. DOI are missing from every reference.	
<b>Optional/General</b> comments	Good subject, with very vast period of investigation and chances of variants were higher among patients. A concurrent investigation is preferable. However, it is dependent on the availability of data. Methodology lack descriptions of technologies used for testing.	

### PART 2:
