PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This study presents the Pattern of Mortality among Neonates Admitted in the Special Care Baby Unit of the Rivers State University Teaching Hospital, Port Harcourt, Nigeria. Overall good retrospective evidence, but better to add some evidence on the following paragraph: Evidence shows that 61% of the mortalities occurred outside regular work hours, known as the call period. Better to discuss this with national standards of doctor-patient ratio and nurse-patient ratio as well as the availability of trained health manpower outside regular work hours to provide quality care	
Minor REVISION comments	I found some grammatical errors, e.g., lack of prepositions, and commas. The choice of words should be revised in some places. (I have highlighted in the manuscript to show some examples.) Better to take help from a language expert as well as a scientific writing expert before publication.	
Optional/General comments	No any
