PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Introduction : Nutcracker syndrome or Nutcracker syndrome results from compression of the left renal vein (VRG LVR), The Nutcracker syndrome is difficult to diagnose in pediatrics in the face of the various causes of abdominal pain and in the face of other possible causes compatible The reference methods to identify this syndrome are always phlebography of the RVG LRV n parallel with the measurement of the pressure gradient between the RVG LRV and the inferior vena cava, or with intravascular USG ? [2 , 8 , 11]. Analgesics may be offered to relieve pain, Aspirin therapy has been reported to improve the left-right renal perfusion ratio in children with SCC NCS [9]. Conclusion: SCC NCS is a rare and underdiagnosed</p>	
Minor REVISION comments	Nutcracker syndrome is a rare disease with only few scarce published literature	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
