

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>I must honour both the Reviewers for their comments. The nature of article is very poor in research, novelty, construction, knowledge of subjects, etc. Overall quality of MS seems a outcome of onetime field survey, some of the major scientific aspects needs to be taken care before further processing of the MS is given in the body text of the MS.</p> <p>It must undergo again to major revision by the authour. Lots of literature are available on biomass carbon and sequestration, hence atleast some level of results must be drawn.</p> <p>Please see the attachment</p>	<p>It is to inform that information presented in the paper is not based on field survey rather a field experiments wherein proper tree and soil data has been taken and later lab analysis has been performed</p> <p>Moreover, all comments of both the reviewers has already been addressed and necessary changes have been made to the manuscript</p>
